

Chemind Waterproofing News Bulletin

What Cost for Premium Quality Liquid Waterproofing

Aquagard M Zero VOC Grey – pure polyurethane membrane for safe waterproofing.

- Lowest \$ cost per 1mm dry film thickness for any VOC compliant, Class III waterproof membrane.
- No need for bond-breaker tape – use Chemflex PU joint sealant fillet only.
- Fast Complete Cure Through – SAFE ACCESS FOR TRADES after overnight drying.
- General purpose waterproofing use under paving or backfill – wet areas, decks, retaining walls.
- Use with Newflex WAM Fibre Class III on walls for a one-step wet area system.

Exposed Chemind Liquid Membranes

ROOFS ' PLANT ROOMS ' BALCONIES ' WALKWAYS ' CAR PARKS ' FACADES

Long life, UV stable, fast cure, economical. Reliable, proven Chemind systems for:

- **Vehicle Traffic** – Chemind Ultraure A-80 System

If you need a trafficable exposed waterproofing, functional or decorative flooring requirement, Chemind has a cost-effective, guaranteed system to meet your needs.

News Flash!!!

What Cost for Premium Quality Liquid Waterproofing

Chemind has the answers for your repair and preparation needs:

- **Chembond** – Polymer binder for cement steel protection, patching mortars and topping.
- **Chemcote W** – High-build, solvent free epoxy for leaking walls and rising damp floors.
- **Chemfloor 100** – 100% epoxy resin for priming, patching, resin binding and protection.
- **Chemsil** – Siloxane/Silane anti-damp injection barrier and anti-carbonation coating.
- **Crystal Seal** – Crystalline growth, penetrating waterproof coating and admixture.
- **Flexicote** – Elastomeric, anti-carbonation, decorative, waterproof membrane coating.
- **Water-Bar 150** – PU injection grout that works (plus injection packers and couplers).
- **Waterstop Plug** – Fast-set - stops the worst of leaks – use non-shrink, slow-set grade for patching.
